# 2020/21

Adhesion Prevention in women  
undergoing gynaecological surgery

**A € 10,000  
budget  
will be allocated**

## OBJECTIVE

This research grant aims to promote clinical research and best practices in the management of adhesion prevention in gynaecological surgery to preserve fertility, particularly for women undergoing high-risk surgery, including:

- Ovarian surgery
- Endometriosis surgery
- Tubal surgery
- Caesarean section surgery
- Myomectomy
- Adhesiolysis
- Oncology surgery
- Uterine curettage and hysteroscopic procedures

Another objective is to evaluate the medico-economic benefits of adhesion prophylaxis.

*Animal research and retrospective analyses on data older than 5 years will not be taken into consideration.*

## ELIGIBLE APPLICANTS

This Grant is open to European Healthcare Professionals involved in gynaecological surgery either registered or in training. Only applicants who fulfill the eligibility criteria will be considered for the Grant.
