

Dear ESGE-YEP Program Officials,

We are delighted to in the ESGE-YEP Program scheduled for October 15-17, 2025, across various cities in Türkiye. We are thrilled to collaborate with you on this prestigious program.

The Mersin University Faculty of Medicine, Department of Obstetrics and Gynecology, is honored to host participants and share our expertise. Our clinic provides a broad spectrum of services in gynecologic oncology, urogynecology, reproductive surgery, and benign gynecological surgeries. With a team of 5 professors and 2 associate professors, we offer a rich educational environment.

Çukurova Regional Airport is 70 km from our city, with regular bus services between the airport and city center. Secure accommodation options, with ease of access to the clinics, will be communicated by our young center administrators.

Mersin, located on Türkiye's southern Mediterranean coast, is a city rich in historical and cultural heritage. Having hosted various civilizations for thousands of years, Mersin is now a dynamic metropolis offering all the amenities of modern living.

Mersin's history dates back to the Neolithic period. Known as Zephyrion in ancient times, the city was an important port during the Roman and Byzantine eras. The city has witnessed the interaction of diverse cultures, contributing to Mersin's rich cultural fabric. The Mersin Archaeology Museum houses significant artifacts reflecting the city's history. Ancient cities, historical fortresses, and religious structures showcase Mersin's historical wealth.

Mersin boasts a coastline along the azure waters of the Mediterranean. Its long coastline is renowned for its natural beaches and bays. The Taurus Mountains in the city's hinterland offer natural beauty. Plateaus, forests, and natural parks provide various activities for nature enthusiasts. Mersin has a typical Mediterranean climate, with hot and dry summers and mild, rainy winters.

We reiterate our gratitude for being part of this valuable program and wish you a successful process.

Sincerely,

Mersin University Faculty of Medicine, Department of Obstetrics and Gynecology.
